EXPORT  
INVESTMENT

AWEX, partner of the international economic development of Wallonia.

The Wallonia Export-Investment Agency (AWEX) is in charge of the development and management of Wallonia's international economic relations.

With regards to foreign trade, the Agency has a promotion and information mission with regard to both the international and Walloon business community.

Intended for purchasers, decision-makers, importers and foreign prospects, the Agency can, on request:

- pass on economic data regarding Wallonia and its export potential;
- provide information on the products and services of Walloon businesses;
- seek Walloon businesses for the conclusion of international partnerships;
- distribute lists of Walloon exporters.

Vis-a-vis Walloon businesses, the Agency is their comprehensive international partner, providing a range of services and activities covering the entire export process:

- General and commercial information on foreign markets;
- Production of individual market studies on request;
- Organisation of commercial canvassing operations (participation in international shows, organisation of economic missions, sector-based contact days, etc.);
- Contacts with international organisations;
- Promotion of Wallonia and its export potential;
- Financial support and funding for exports;
- Training and raising awareness of international professions.

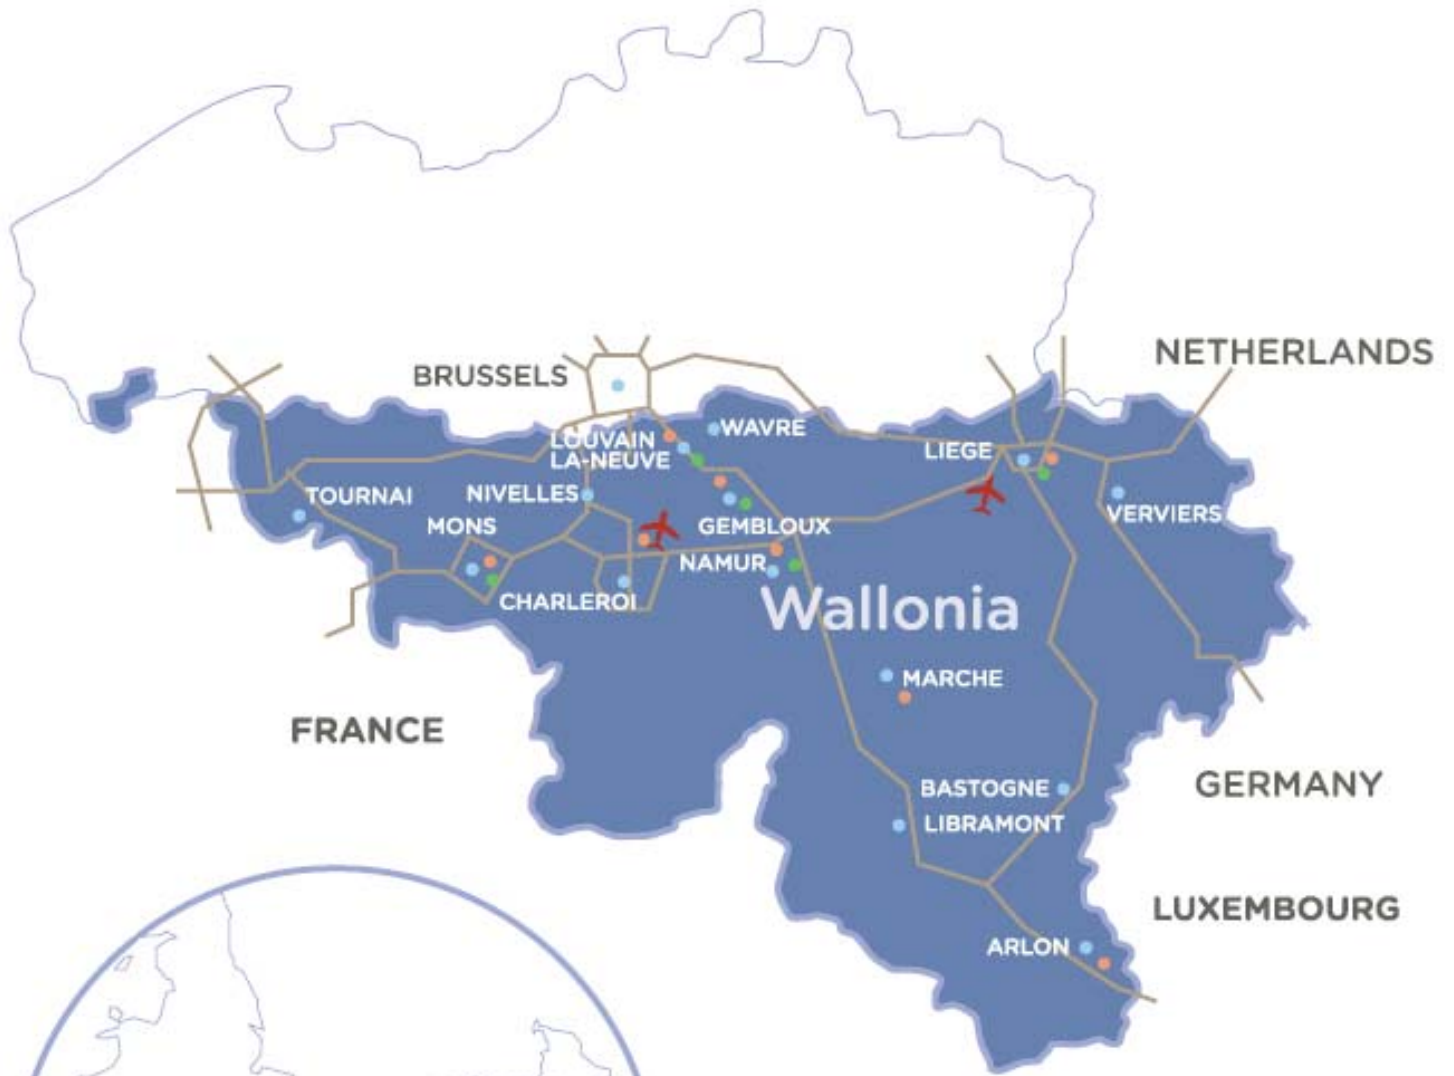

With regards to foreign investment, the Agency provides general expertise in the areas of promotion, prospecting and informing potential investors. It also ensures active monitoring of investors based in Wallonia, as well a mission to find foreign buyers for Walloon industrial sites in the process of restructuring.

AWEX is also competent for the strengthening of the Wallonia brand image overseas.

AWEX has a workforce of more than 400 people and about one hundred offices overseas.

ALX Systems is providing advanced solutions to make drone autonomous. We allow UAVs to be integrated in smart cities, complex surveillance missions or transportation.

The UAVs can interact with their environment, the air traffic control, and even other equipment like trackers, IP Camera, phones,...

The system is completely programmable, and a software development kit allow our customer to create quickly and easily new missions.

The system includes a deep learning computer vision solution, which allow the operators to teach to the drone to recognize objects.

By using ALX solutions, our customers are giving to their projects unseen capabilities. Out-of-the box, we propose counter drones, surveillance and transportation solutions.

At NAB 2018, first time exhibitor CyanView (Booth C8530) will be showcasing its Cy-Stem universal mini-camera system.

Cy-Stem is highly cost-effective, and provides unique versatility and flexibility, enabling the highest degree of creativity, accuracy and quality in a wide range of applications where universal camera control is required.

Based exclusively on IP technology, the Cy-Stem range comprises an RCP control panel and a series of small hardware modules that address three key areas of outside/live broadcasting such as sports events, reality TV and game shows: control, image quality and content transport.

Live demonstrations at NAB of Cy-Stem's unparalleled remote control capabilities will see the CyanView stand connected via RF with the Silvus Technologies stand. Silvus is a provider of multi-antenna MIMO technology for wireless communications in harsh conditions. Also featured will be demonstration of a drone application.

Image Matters provides electronics modules to help equipment manufacturers jump faster into new video dimensions. Using origami's modularity concept, Image Matters' products split the electronics into pre-validated subsystems and provides an easy-to-use software environment to customize and build complete systems:

- 1/ A processing module: groups FPGA, memory, security chip, local power supply and other essential components to run the FPGA in a credit card size module
- 2/ A connector: high-density board-to-board connector custom made for the origami modularity concept
- 3/ A carrier: application layer easily adapted to all required interfaces

Image Matters builds both modules and carriers for various industries requiring very high-quality processing.
